Ex.

The screenshot shows the PIUSI Restore Tool v1.0.6.0 interface. At the top, there's a title bar with the PIUSI logo, the text 'Restore Tool - v.1.0.6.0', and a link to 'open LOG file'. Below the title bar, a message reads: 'Use this tool to RESTORE backup file created by PIUSI software.' There are two dropdown menus: 'Select Software' set to 'Self Service Management 2.0' and 'Selected .bck file to restore' with a 'BROWSE' button next to it. The file path 'C:\PIUSI\_SSM2\PIUSI\_SSM2\_DB\BACKUP\ssm2\_bck\_20180321\_140737.bck' is displayed in a text box. Below this, a message states: 'Your software version is 1.2.15.0 and the current database version is: 2.0 . The selected backup file will restore your database to version: 2.0'. At the bottom, an orange banner contains the text: 'The restore procedure overwrites your previous data. Are you sure?'. To the right of the banner are two buttons: 'Yes' (highlighted with a red box) and 'No'.

Ex.

The screenshot shows the same PIUSI Restore Tool v1.0.6.0 interface, but now the 'Restore completed' button at the bottom is highlighted with a red box and a red checkmark. The 'BROWSE' button next to the 'Selected .bck file to restore' field is also highlighted with a red box. The rest of the interface remains the same as in the previous screenshot.
