

## LLDPE - POLYETHYLENE CHEMICALS RESISTANCE TABLE

A = Resistant      B = Limited resistance      C = Not resistant - do not use

This table is a compilation of existing published data from leading manufacturers of polyethylene available on the web.  
Before to use a rotomoulded product ( tanks, bunds) check this table.

Remember that the aggressiveness of chemicals increase with the increase of temperature, of contact time, of pressure and with the plastic aging.
